

Routes

See the [EEHW area map](#) to see where we go. We publish a [full walks programme](#) every quarter year.

See the route table on this page for starting points post codes hilliness and maps. Please note that post codes are nearest as not all starting points have a post code. Each location has an indication of whether the walk has some hills or is relatively flat. Maps show the starting points together with bus routes the nearest railway stations and possible routes for the walks however walk leaders may vary the routes shown.
